

## Busitec improves web security

Iconic IT works with Busitec GMBH to protect its employees and IT estate from Web-based threats.

### The Customer:

Busitec GMBH is a German IT consulting and development company specialising in Portals and Document Management. For over ten years Busitec GMBH have successfully Management (ECM) solutions for a number of prestigious clients.

### The Challenge:

- > Produce a plan of work.
- > Verify Existing Firewall and Publishing Rules.
- > Install and configure Forefront TMG 2010.
- > Document the solution and handover to Busitec GMBH support team.

*“Our existing firewall could not keep up with the growing demand of further expansion of our business. Iconic IT helped us to bring our firewall up to date, cutting down on maintenance costs while providing more flexibility.”*

**Henning Eiben – Director (Busitec GMBH)**

### The Solution:

One of our Iconic IT professionals travelled to Munster, Germany to work alongside the Busitec GMBH onsite support team and ensure a seamless handover of the solution.

Iconic IT installed, configured, tested and documented Forefront TMG creating a highly-available and highly-secure firewall solution on Dell hardware. Our specialist replicated and consolidated all existing firewall rules allowing Iconic IT to remove the existing Lancom firewall. Iconic IT implemented a new site-to-site VPN's, applied website, extranet and intranet publishing rules, established Lync publishing and secure web access.

All work (including configuration and firewall rules) was fully documented and handed over to the Busitec GMBH support team.

### The Benefits:

*“Iconic IT worked very closely with our support team, very quickly implementing the TMG solution and migrating the existing firewall with almost no downtime. Because of the site-by-site implementation our staff can now maintain TMG 2010 and continuously improve services for our customers as well as employees.”*
